---

No Fault Fact of the Day

In 2010, there were **282,075 Traffic Crashes** resulting in **70,501 Persons Injured**. Proponents of this reform support their position by claiming that "only" 1% of these crashes exceed \$250,000, the minimum coverage outlined in HB 4936. This means **2,820 seriously injured people** would potentially be left without coverage for their care expenses.

What will these people do?

Please oppose these changes.

This bill **WILL COST JOBS** and leave some people without coverage and then have to go under the Medicare system.

Our Medicare system is already burdened and under funded. The people voted this in years ago cause it is a great system and works.
